

Dolly

Garage door opener for sectional and counterweight doors up to 16 m² for residential and industrial settings

24Vdc motor suitable for semi intensive and intensive use.

Extremely compact design to adapt to any installation context.

Control unit integrated onboard the motor and user friendly programming display.

Double encoder technology for maximum precision in opening and closing.

Integrated low-consumption LED courtesy light.

Embedded receiver with a storage capacity up to 40 different user codes.

Plug-in terminals for accessory connection.

Compartment for plug-and-play back-up battery connection to grant continue operation even in the event of power cut.

Quick motor fixing to the rail.

Pre-assembled steel rail provided in two pieces.

Belt-transmission system for silent operation and easy adjustment.

Available in **3 different versions** based on door size and use

Garage Door Automation

THE RANGE

	Power supply	Lift force	Max door surface	Drive system	Rail
DOLLY 600	24V	600 N	10 m ²	belt	3,0 m (MDLR01 = 2 pieces, 1500 ÷ 1500 mm)
DOLLY 1000	24V	1000 N	14 m ²	belt	3,2 m (MDLR01 = 2 pieces, 1600 ÷ 1600 mm)
DOLLY 1200	24V	1200 N	16 m ²	belt	3,5 m (MDLR03 = 2 pieces, 1750 ÷ 1750 mm)

DIMENSIONS

TECHNICAL FEATURES

	DOLLY 600	DOLLY 1000	DOLLY 1200
Power supply	230V-50/60Hz	230V-50/60 Hz	230V-50/60Hz
Motor voltage	24V dc	24V dc	24V dc
Maximum power	200 W	245W	260W
Maximum traction force	600 N	1000 N	1200 N
Rated force	300 N	400 N	450 N
Maximum door area	10 m ²	14 m ²	16 m ²
Maximum door weight	100 kg	140 kg	160 kg
Maximum continuous operating time	4 min ON	4 min ON	4 min ON
Cycles/hour (max)	36 min OFF	36 min OFF	36 min OFF
IP protection rating	20	15	13
Working temperature	20	20	20
